Art Unit: 3781

1. Claims 1-5 are rejected under 35 U.S.C. 102 (b) as being anticipated by Kazmark, Jr. et al. (5522615) or Tsai (5692266). Kazmark, Jr. teaches a retractable handle having a support tube 16, sliding tube 13, locking means, a connecting rod 29, damping means floatably deposited between a lower portion of the sliding tube and the bottom of the support tube to damply extending upward. Tsai also teaches a retractable handle having a support tube 10, sliding tube 12, locking means, a connecting rod 29, damping means floatably deposited between a lower portion of the sliding tube and the bottom of the support tube to damply extending upward

Regarding claim 3, note the damping means coupled to the lower portion of the bottom of the sliding tube as shown in Fig. 4 at the lower portion of the locking means.

Regarding claim 5, it is noted that Fig. 4 shows the damping means and the locking means being integral with each other.

2. Claims 6-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
